

# Installing Bowland High’s certificate on a Windows 10 Computer

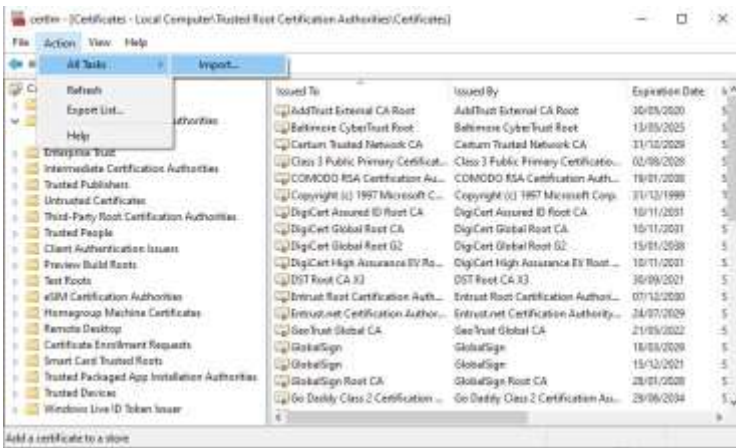

Please make sure you have downloaded the certificate file from <https://bowlandvle.atctrust.org.uk> before proceeding.

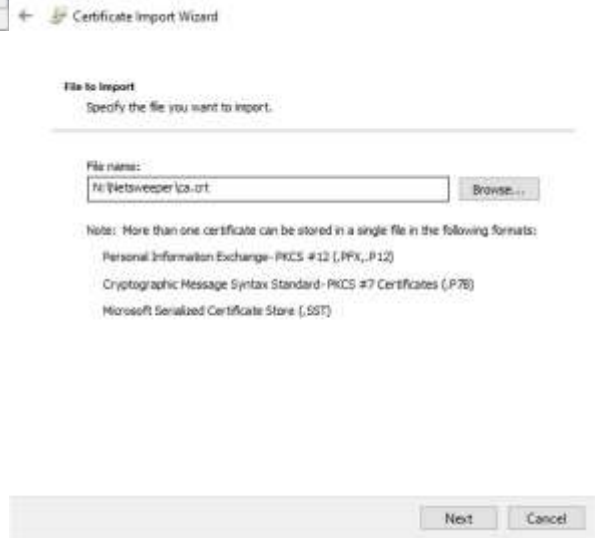

Step 1: Navigate to the start menu and search for “Manage Computer Certificates”.

Step 2: Once the new window opens, navigate to the folder “Trusted Root Certification Authorities > Certificates”

Step 3: Now go to “Action > All Tasks > Import”

Step 4: A new window will open. Click “Next” and you should then see the screen shown. Click the “Browse...” button and find the downloaded “Certificate (1/2/3).cer” file (This is normally located in your downloads folder). Click “Next”

**Certificate Store**

Certificate stores are system areas where certificates are kept.

Windows can automatically select a certificate store, or you can specify a location for the certificate.

- Automatically select the certificate store based on the type of certificate
- Place all certificates in the following store:

Certificate store:

Trusted Root Certification Authorities

Step 5: Make sure the “Place all certificates in the following store” is selected and “Trusted Root Certification Authorities” is in the text box. After clicking “Next”, you should then see a summary of the import. Click “Finish”

Step 6: if it was successful, you should get a conformation box. Please make sure that you can see the highlighted certificates shown. Repeat for all 3.
